

ONLINE MUSIC RESOURCES

The first and best and always improving online church music site:

Check out: www.churchofjesuschrist.org/music/library?lang=eng Here you can find any song printed in any church publication, hymnbook, children's songbook, camp songbook, etc. In addition you can listen to the audio, print the sheet music and download both to your computer. You can often change the key before you print!

Want to check out free music written by LDS composers on the above site?

Check out: www.churchofjesuschrist.org/music/library/music-for-choirs?lang=eng

And: www.churchofjesuschrist.org/music/library/submitted-music?lang=eng

New hymn arrangements and anthems for choirs can be found as well as duets, solos, etc. All are written by members of the Church who have shared their talents.

Want to listen to any song performed by the Tabernacle Choir in conference?

See: <https://www.thetabernaclechoir.org/watch-listen/sacred-music-library.html>

Want to listen to any song ever sung in General Conference by any group?

Go to: <https://www.churchofjesuschrist.org/general-conference/music?lang=eng>

(Search by hymn, artist, title, or date....Then check the conference issue of the Ensign that year for the listing of the music, composer, arranger, etc.)

Want to convert a youtube video to an mp3 file and save it on your computer?

Go to the youtube video you wish to convert. Highlight the address bar, then right click and copy. Then go to this website: <https://ytmp3.cc/> Then right click and paste the address you copied and click "Convert". The file will convert and then you will click the download box, then find the downloaded file in the upper right below the arrow. Drag your file to your desktop.

Want to download audio clips from other music websites?

Not all are the same, but generally you can manage to download from almost any site that lets you listen by right clicking a 'play' button or a microphone. Then you will see an options box....go to 'save audio as'. Or if you don't see that you may see an option of 'video download helper' which will open another box to download. Try Firefox if Explorer doesn't work.
